PROFESSIONAL SUMMARY

Full-Stack Software Engineer with 8+ years of professional software development experience across FinTech, TravelTech, and PropTech. Strong hands-on experience building production applications with Python/Flask, React, JavaScript/TypeScript, REST APIs, SQL, Docker and cloud platforms (AWS, Azure). Experienced in translating complex requirements into maintainable software, reviewing code, writing unit tests, troubleshooting production systems, and working across the full software development lifecycle in Agile teams. Also experienced in Python-based data analysis and classification-model workflows, including postgraduate research applying machine learning to health-risk prediction, with a strong interest in AI model evaluation, code quality, and AI-assisted software development.

CAREER HIGHLIGHTS

- 8+ years building enterprise web applications and RESTful APIs/microservices.
- 5+ years of commercial React development, plus hands-on Angular experience consuming REST APIs.
- Experience across TravelTech, FinTech, and PropTech, including production-grade fintech applications.
- Designed and implemented backend services using Python, Flask, SQLAlchemy, and MySQL.
- Integrated Amadeus, Sabre, Verteil, and Paystack APIs.
- Experience with AWS, Azure, and Docker in scalable, highly available web environments.
- Provided Level 2 support for production software, working with support stakeholders to maintain system stability and availability.
- Applied Python-based machine learning techniques during postgraduate research, building and evaluating classification models to predict hypertension risk from health data.
- Certified Agile Scrum Master; active contributor across planning, programming, testing and analysis on cross-functional Agile teams.
- Strong advocate for UX/UI-conscious design, code quality, and continuous improvement of engineering practices.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, Python

Frontend: React, Next.js, Angular, Redux, Webpack, HTML5, CSS3, Bootstrap

Frontend Testing: Jest, Enzyme (familiarity)

Backend: Flask, SQLAlchemy, RESTful APIs & Microservices

Databases: MySQL, MongoDB

Cloud & DevOps: Docker, AWS, Azure, CI/CD

AI / Machine Learning: Python-based data analysis & classification modelling, model evaluation (accuracy, precision, recall), familiarity with LLM-based developer tools (e.g., GitHub Copilot, ChatGPT), strong interest in LLM evaluation and AI-assisted development

Tools: Git, GitHub, Jira, Trello, Postman

Engineering Practices: Agile Scrum, SDLC, API Integration, Authentication & Authorization, Unit Testing, QA Collaboration, UX/UI Fundamentals, Responsive Design, Code Reviews, Software Architecture, Level 2 Production Support

PROFESSIONAL EXPERIENCE

Software Engineer (Contract) | Jamborow Limited (Remote) | August 2023 – Present

Tech Stack: React, Python, Flask, MySQL, MongoDB, Docker, AWS, REST APIs

- Designed and developed production-ready fintech applications using React, Python, and Flask.
- Built RESTful APIs and backend microservices using Flask, SQLAlchemy, MySQL, and MongoDB, translating business requirements into technical specifications.
- Wrote and maintained unit tests (Jest) as part of the development lifecycle, collaborating with QA to define test coverage and acceptance criteria.
- Containerized application components with Docker for consistent, scalable deployments.
- Provided Level 2 support for production systems, troubleshooting issues in a highly scalable web environment.
- Collaborated with distributed Agile teams across planning, development, testing, and analysis, using Git and code reviews.

Software Consultant (Contract) | Finchglow Holdings (TravelDen) | March 2025 – October 2025

Tech Stack: React, Next.js, TypeScript, AWS, REST APIs, Jira

- Led frontend delivery for the TravelDen Online Travel Agency platform, consuming REST APIs to power core booking flows.
- Integrated Amadeus, Sabre, and Verteil APIs, translating business and client requirements into working features.
- Developed reusable UI components with an emphasis on UX/UI consistency, improving maintainability and delivery speed.
- Collaborated with cross-functional Agile teams and IT stakeholders to deliver stable production releases.

Senior Software Developer | Wakanow Group | September 2021 – July 2024

Tech Stack: React, Angular, TypeScript, JavaScript, REST APIs, Azure, Git

- Developed enterprise React and Angular applications for travel platforms, consuming REST APIs across both frameworks.
- Designed reusable component libraries with Redux for state management, and integrated secure REST APIs.
- Optimized frontend performance and contributed to production releases in a highly scalable web environment.
- Participated in technical sessions with support stakeholders to help maintain software stability and availability.
- Mentored junior developers through code reviews and contributed ideas to improve team development practices.

Junior Software Developer | Wakanow Group | September 2017 – September 2021

Tech Stack: React, Angular, JavaScript, REST APIs

- Built responsive, cross-browser user interfaces using React and Angular, ensuring consistent behavior and usability across desktop and mobile devices.
- Designed and developed reusable UI components, reducing duplicate code and speeding up delivery across multiple feature teams.
- Integrated REST APIs to connect frontend interfaces with backend services, handling authentication, data fetching, and error states cleanly.
- Improved application performance through targeted optimizations such as code splitting, lazy loading, and reducing unnecessary re-renders.
- Supported testing, debugging, and Level 2 troubleshooting of production systems.

Web Content Management Specialist | Wakanow Group | August 2015 – September 2017

Tech Stack: SEO, CMS

- Managed and maintained digital content across multiple enterprise travel platforms, ensuring accuracy, consistency, and brand alignment throughout the customer journey.
- Improved website quality and search visibility through structured SEO optimization, including keyword strategy, on-page improvements, and content audits.
- Collaborated closely with engineering and marketing teams to align content updates with platform releases, improving load times, usability, and overall user experience across the site.

FEATURED PROJECTS

MSc Dissertation — Machine Learning Classification Model for Hypertension Risk Prediction | Academic Research Project

Tech Stack: Python, classification algorithms, model evaluation metrics

- Designed and trained classification models to predict hypertension risk from health-related data, as part of MSc dissertation research.
- Performed data cleaning, feature preparation, and model training using Python-based workflows.
- Evaluated model performance using standard classification metrics (accuracy, precision, recall) to assess predictive reliability.
- Applied a structured, iterative evaluation methodology directly relevant to broader AI/ML model evaluation practice.

Verified Shortlet Booking Platform | Personal Project

Tech Stack: Python, Flask, SQLAlchemy, MySQL, Docker, AWS, Bootstrap, JavaScript, Paystack API

- Designed a multi-role property rental platform for customers, hosts, and administrators.
- Implemented authentication, booking management, host verification, reviews, notifications, and an admin dashboard on a Flask-based backend.
- Integrated Paystack payment processing.
- Dockerized the application and prepared it for AWS deployment.

Wedding & Event Management Platform | In Development – 90% Complete

Tech Stack: React, Python, Flask, MySQL, REST APIs, Docker, AWS

A full-stack event planning platform for clients, vendors, and administrators, featuring vendor management, an event planning dashboard, customer authentication, booking and scheduling, budget tracking, payment integration, a responsive UI, REST API architecture, and an admin dashboard.

EDUCATION

M.Sc. Technology Project Management – Cardiff Metropolitan University, UK

B.Sc. Educational Technology – University of Ilorin, Nigeria

CERTIFICATIONS

- Certified Agile Scrum Master – LinkedIn
- Software Development – Moat Academy
