

## DEBBY SINKALU

### FRONTEND, BACKEND. FULL STACK SOFTWARE ENGINEER

React • Next.js • Python • Flask • TypeScript • AWS • Azure • Docker • REST APIs

Lagos, Nigeria | Phone | Email | LinkedIn | GitHub | Portfolio

### Professional Summary

Software Engineer with over 8 years of experience delivering enterprise-grade software solutions across Travel Technology, Financial Technology (FinTech), and Property Technology (PropTech). Brings more than 5 years of professional React development experience, complemented by strong backend expertise in Python, Flask, SQLAlchemy, and RESTful API development. Experienced in designing scalable web applications, integrating third-party platforms, modernizing legacy systems, and delivering secure, high-performance software in Agile environments. Passionate about clean architecture, user-centric design, and engineering excellence.

### Career Highlights

- 8+ years building enterprise web applications.
- 5+ years of commercial React development.
- Experience across TravelTech, FinTech, and PropTech.
- Designed backend services using Python, Flask, SQLAlchemy, and MySQL.
- Integrated Amadeus, Sabre, Verteil, and Paystack APIs.
- Experience with AWS, Azure, and Docker.
- Built platforms featuring authentication, bookings, payments, notifications, and admin workflows.
- Strong advocate of Agile delivery, code quality, and collaborative software engineering.

### Technical Skills

**Languages:** JavaScript (ES6+), TypeScript, Python

**Frontend:** React, Next.js, Angular, HTML5, CSS3, Bootstrap

**Backend:** Flask, SQLAlchemy, RESTful APIs

**Databases:** MySQL, MongoDB

**Cloud & DevOps:** Docker, AWS, Azure, CI/CD

**Tools:** Git, GitHub, Jira, Trello, Postman

**Engineering Practices:** Agile Scrum, SDLC, API Integration, Authentication & Authorization, Responsive Design, Code Reviews, Software Architecture

## Professional Experience

### Software Engineer (Contract) | Jamborow Limited (Remote)

August 2023 – Present

**Tech Stack:** React, Python, Flask, MySQL, MongoDB, Docker, AWS, REST APIs

- Designed and developed production-ready fintech applications using React, Python, and Flask.
- Built RESTful APIs and backend services using Flask, SQLAlchemy, MySQL, and MongoDB.
- Containerized application components with Docker for consistent deployments.
- Collaborated with distributed Agile teams using Git, code reviews, and sprint planning.

### Software Consultant (Contract) | Finchglow Holdings (Travelden)

March 2025 – October 2025

**Tech Stack:** React, Next.js, TypeScript, AWS, REST APIs, Jira

- Led frontend delivery for the Travelden Online Travel Agency platform.
- Integrated Amadeus, Sabre, and Verteil APIs.
- Developed reusable UI components, improving maintainability and delivery speed.
- Collaborated with cross-functional Agile teams to deliver production releases.

### Senior Software Developer | Wakanow Group

September 2021 – July 2024

**Tech Stack:** React, Angular, TypeScript, JavaScript, REST APIs, Azure, Git

- Developed enterprise React and Angular applications for travel platforms.
- Designed reusable component libraries and integrated secure REST APIs.
- Optimized frontend performance and contributed to production releases.
- Mentored junior developers through code reviews.

### Junior Software Developer | Wakanow Group

September 2017 – September 2021

**Tech Stack:** React, Angular, JavaScript, REST APIs

- Built responsive React interfaces and reusable UI components.
- Integrated REST APIs and improved application performance.
- Supported testing, debugging, and production systems.

### Web Content Management Specialist | Wakanow Group

August 2015 – September 2017

**Tech Stack:** SEO, CMS

- Managed digital content for enterprise travel platforms.
- Improved website quality through SEO optimization and collaboration with engineering teams.

## Featured Project

[Click Link Here](#)

### Verified Shortlet Booking Platform

Tech Stack: Python, Flask, SQLAlchemy, MySQL, Docker, AWS, Bootstrap, JavaScript, Paystack API

- Designed a multi-role property rental platform for customers, hosts, and administrators.
- Implemented authentication, booking management, host verification, reviews, notifications, and admin dashboard.
- Integrated Paystack payment processing.
- Dockerized the application and prepared it for AWS deployment.

### Wedding & Event Management Platform *(In Development)*

#### Tech Stack

React • Python • Flask • MySQL • REST APIs • Docker • AWS

#### Description

A modern full-stack event planning platform designed to streamline wedding and event management for clients, vendors, and administrators. Currently in active development and approaching production readiness.

#### Key Features

- Vendor management
- Event planning dashboard
- Customer authentication
- Booking and scheduling
- Budget tracking
- Payment integration

- Responsive UI
- REST API architecture
- Admin dashboard

### **Status**

**Currently under active development (approximately 75% complete).**

### **Education**

M.Sc. Technology Project Management – Cardiff Metropolitan University, UK

B.Sc. Educational Technology – University of Ilorin, Nigeria

### **Certifications**

Certified Agile Scrum Master -- LinkedIn

Software Development – Moat Academy
