

DEBBY SINKALU

FULL STACK SOFTWARE ENGINEER

Lagos, Nigeria | Phone: +234 810 757 8965 | Email: debbykalu@gmail.com | LinkedIn: linkedin.com/in/debby-s-54553b6b | GitHub: github.com/Debbykalu

PROFESSIONAL SUMMARY

Full Stack Software Engineer with over 8 years of experience delivering enterprise-grade software solutions across Travel Technology, Financial Technology (FinTech), and Property Technology (PropTech). Brings more than 5 years of professional React development experience, complemented by strong backend expertise in Python, Flask, SQLAlchemy, and RESTful API development. Experienced in designing scalable web applications, integrating third-party platforms, modernizing legacy systems, and delivering secure, high-performance software in Agile environments. Passionate about clean architecture, user-centric design, and engineering excellence.

CAREER HIGHLIGHTS

- 8+ years building enterprise web applications and software systems.
- 5+ years of commercial React & frontend ecosystem development.
- Proven domain experience traversing TravelTech, FinTech, and PropTech.
- Designed and maintained backend services using Python, Flask, SQLAlchemy, and MySQL.
- Integrated Amadeus, Sabre, Verteil, and Paystack APIs.
- Extensive experience with AWS, Azure, Docker, and CI/CD pipelines.
- Built platforms featuring authentication, bookings, payments, notifications, and administrative dashboards.
- Strong advocate of Agile delivery, code quality, and collaborative software engineering.

TECHNICAL SKILLS

Languages:	JavaScript (ES6+), TypeScript, Python
Frontend:	React, Next.js, Angular, HTML5, CSS3, Bootstrap
Backend:	Flask, SQLAlchemy, RESTful APIs
Databases:	MySQL, MongoDB
Cloud & DevOps:	Docker, AWS, Azure, CI/CD
Tools:	Git, GitHub, Jira, Trello, Postman
Practices:	Agile Scrum, SDLC, API Integration, Authentication & Authorization, Responsive Design, Code Reviews, Software Architecture

PROFESSIONAL EXPERIENCE

Full Stack Software Engineer (Contract) | Jamborow Limited (Remote) Aug 2023 - Present

Tech Stack: React, Python, Flask, MySQL, MongoDB, Docker, AWS, REST APIs

- Design and build production-ready FinTech products using Flask backends and React frontends.
- Build secure, modular RESTful APIs and backend services using Flask, SQLAlchemy, MySQL, and MongoDB.
- Containerize application components with Docker to ensure consistent environments across staging and production.
- Collaborate actively with distributed Agile teams using Git, driving code reviews, and sprint planning cycles.

Software Consultant (Contract) | Finchglow Holdings (Travelden) Mar 2025 - Oct 2025

Tech Stack: React, Next.js, TypeScript, AWS, REST APIs, Jira

- Led frontend delivery for the Travelden Online Travel Agency (OTA) platform.
- Integrated Amadeus, Sabre, and Verteil GDS APIs to handle flight search and booking flows.
- Developed reusable UI component libraries, improving frontend code maintainability and delivery speed.

- Collaborated with cross-functional Agile teams to deliver secure, high-performance production releases.

Software Developer | [Wakanow Group](#)

Sep 2021 - Jul 2024

Tech Stack: React, Angular, TypeScript, JavaScript, REST APIs, Azure, Git

- Developed enterprise React and Angular applications handling large volumes of travel bookings and search queries.
- Designed reusable component libraries and integrated secure REST APIs with frontend architectures.
- Optimized frontend performance and contributed to stable production release cycles.
- Mentored junior developers through structured code reviews and knowledge sharing.

Junior Software Developer | [Wakanow Group](#)

Sep 2017 - Sep 2021

Tech Stack: React, Angular, JavaScript, REST APIs

- Built responsive React user interfaces and modular UI components.
- Integrated REST APIs and contributed to performance optimizations.
- Supported testing, debugging, and maintaining production systems.

Web Content Management Specialist | [Wakanow Group](#)

Aug 2015 - Sep 2017

Tech Stack: SEO, CMS

- Managed digital content pipelines and search engine optimization (SEO) alignment for travel web platforms.
- Improved website quality, usability, and speed in coordination with engineering teams.

FEATURED PROJECTS

Verified Shortlet Booking Platform

Tech Stack: Python, Flask, SQLAlchemy, MySQL, Docker, AWS, Bootstrap, JavaScript, Paystack API

- Designed a multi-role property rental platform facilitating customer searches, host listings, and admin dashboards.
- Implemented authentication, booking management, host verification checkpoints, reviews, and notifications.
- Integrated the Paystack payment gateway for secure local and international transactions.
- Dockerized the application components to enforce fast, reproducible staging and AWS deployments.

Wedding & Event Management Platform (In Development)

Tech Stack: React, Python, Flask, MySQL, REST APIs, Docker, AWS

A modern full-stack event planning web system streamlining vendor dashboards, client bookings, budget tracking, customer authentication, and responsive client-facing checklist panels. Currently 75% complete.

EDUCATION & CERTIFICATIONS

M.Sc. Technology Project Management – Cardiff Metropolitan University, UK

B.Sc. Educational Technology – University of Ilorin, Nigeria

Certified Agile Scrum Master – LinkedIn

Software Development Curriculum – Moat Academy
